REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The prior art, either alone or in combination, does not disclose or render obvious wherein the irradiating of the photosensitive optical material is performed for a selected period of time with light having an intensity and wavelength to induce the gradient in index-of-refraction along the direction of the irradiating, the gradient in index-of-refraction at least about 1EXP-8 index units per micron in combination with the rest of claim 17 for the reasons stated by Applicant in the Remarks section filed 10/17/06.

It is noted that the claim 17 is allowable because the unique combination of each and every specific element stated in the claim.

The prior art, either alone or in combination, does not disclose or render obvious a method comprising irradiating the photosensitive optical material to create a light-induced gradient in index-of-refraction wherein the photosensitive optical material comprises a gradient in composition of a dopant that induces photosensitivity of the material wherein the composition gradient results in the index-of-refraction gradient following the irradiating for the reasons stated by Applicant in the Remarks section filed 10/17/06.

It is noted that the claim 53 is allowable because the unique combination of each and every specific element stated in the claim.

It is noted that Hill et al. (4474427) does not teach a dopant gradient as required in instant claim 53. Hill et al.'s graded refractive index is based on an interference

pattern (standing wave) of light in a material with a uniform doping level whereas, in contrast, instant claim 53 requires a gradient in composition of a dopant.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael P. Mooney whose telephone number is 571-272-2422. The examiner can normally be reached during weekdays, M-F.
